

## **AMENDMENTS TO THE SPECIFICATION**

Please insert the following headings and paragraph on page 1, before line 1:

### **CROSS REFERENCE TO RELATED APPLICATIONS**

This application is a §371 national stage application of International Application No. PCT/FR03/002745 filed September 18, 2003, which claims priority to French Application No. 02/11670 filed September 20, 2002.

### **BACKGROUND OF THE INVENTION**

#### **Field of the Invention**

Please insert the following heading on page 1, after line 2:

#### **Description of Related Art**

Please insert the following heading on page 2, before line 1:

### **SUMMARY OF THE INVENTION**

Please insert the following headings and paragraphs on page 2, after line 9:

### **BRIEF DESCRIPTION OF THE FIGURES**

The invention will be better understood by using the detailed description of a preferred embodiment of the invention, which is disclosed below, and the appended figures.

Figure 1 is a cross-sectional view of a pot after the granular conductive material has been deposited and it has been crushed between the anodes and the cathodes.

Figure 2 is a view from above of a template allowing the contact blocks to be deposited within the pot.

Figure 3 is a transverse cross-sectional view of the template shown in Figure 2.

Figure 4 is a view of a contact block of granular conductive material after the template has been removed.

DETAILED DESCRIPTION OF A PREFERRED EMBODIMENT

Please delete the following paragraphs on page 4, lines 9-20:

~~The invention will be better understood by using the detailed description of a preferred embodiment of the invention, which is disclosed below, and the appended figures.~~

~~Figure 1 is a cross-sectional view of a pot after the granular conductive material has been deposited and it has been crushed between the anodes and the cathodes.~~

~~Figure 2 is a view from above of a template allowing the contact blocks to be deposited within the pot.~~

~~Figure 3 is a transverse cross-sectional view of the template shown in Figure 2.~~

~~Figure 4 is a view of a contact block of granular conductive material after the template has been removed.~~
